

# TB Saathi

A cross-platform anonymous tuberculosis reporting tool for IPs

## Our Idea

### 01 Anonymous Reporting

The identity of the reporting IP remains confidential.

### 02 Communication to Government Healthcare

As soon as a new patient's record is added the nearest PHC is intimated.

### 03 Volunteer Certification

Any individual or a group that volunteer to help are welcomed and are issued with certificates (government approved when possible)

### 04 Long-time continuous patient outreach

There will be constant support provided to the patient using our volunteer program.

## TB Saathi

Report patient problems.

### Details

First name

Last name

Phone Number (Optional)

10 digit number

Age

Gender

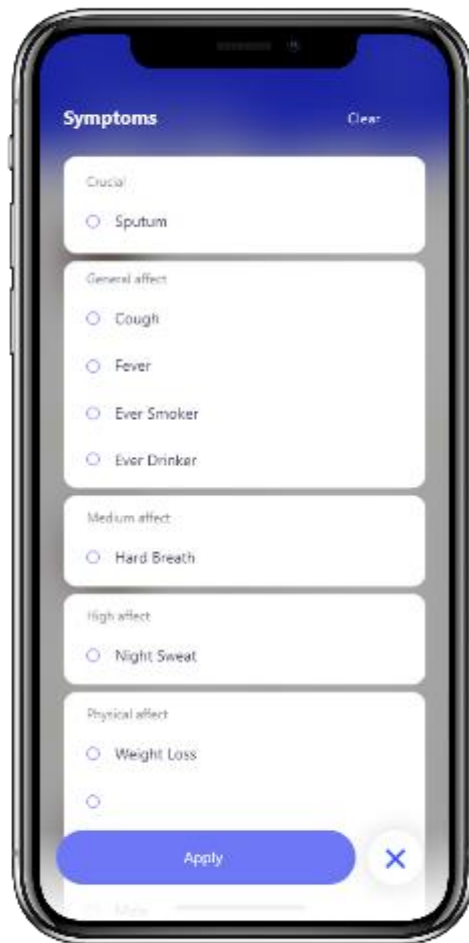

House No, Area

Village

ZipCode

Symptoms

- ☐ Persistent Dry Cough
- ☐ Loss Appetite
- ☐ Ever Smoker
- ☐ Ever Drinker
- ☐ Sputum Cough Occured
- ☐ Fever
- ☐ Night Sweats
- ☐ Weight Loss

A stethoscope is visible in the background, its silver tubing and chest piece partially obscured by the dark blue gradient. The background is a solid dark blue with a subtle gradient.

# Our Aim

- ✓ **Helping eradicate tuberculosis from the country.**
- ✓ **Enhancing the official healthcare database using informal sources.**
- ✓ **Providing certified volunteering opportunities.**

A stethoscope and a reflex hammer are positioned on a blue background. The stethoscope is silver with two white earpieces and a circular chest piece. The reflex hammer is also silver with a black handle. Both are partially visible, with the stethoscope's chest piece and the hammer's head resting on the surface.

## Current Scenario

**Every year approximately 1.12 million patients lack proper access to any formal healthcare system.**

# Key Activities

**Collaborate with  
volunteering  
organizations**

**Building trust  
among IPs**

**Building a more  
robust reference  
Database.**

**Partnering with  
Volunteers and  
the Government**

# Revenue Model
